1859

28 Essex Street, Strand, London, W.C.2

Registered as a Newspaper

APRIL 13, 1946

Annual Subscription (with Diary) 25/-. Single copies 9d.

Under the Trade Mark 'SOLUTHIAZOLE' we now introduce a neutral, soluble de-rivative of sulphathiazole for parenteral administration and topical application. Its local tolerance is markedly superior to that of the highly alkaline sodium salts of sulphonamides and its activity is no

less. This new soluble salt will occupy an important place in sulphonamide

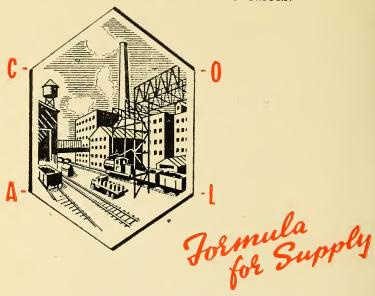

SUPPLIES:—45 per cent solution. Each 5 c.c. contains the equivalent of I gramme of sulphathiazole.

Boxes of 5 x 5 c.c. ampoules Boxes of 25 x 5 c.c. ampoules Rubber-capped containers of 25 c.c.

MAY & BAKER LTD.

PHARMACEUTICAL SPECIALITIES (MAY & BAKER) LTD., DAGENHAM

manufactured by

A strange formula at first sight. But with Coal, Oil, Agriculture and Lime as the four main sources of raw materials for the organic chemical industry, it is readily apparent why C. O. A. L. is the formula for supply — now and in the years ahead.

This country, with its wealth of coal, logically uses the various derivatives and by-products of this basic raw materia as the start-point of the majority of its chemical syntheses. We at Monsanto have pioneered this field for nearly 80 years and, from coal tar by-products, built up a range of synthetic covering the whole gamut of Industry.

The organic chemical industry is, and will remain, one of the most important British Industries during the struggle to regain and retain economic prosperity and security. Monsantowill continue to play an important role in this programmy and, whatever your plans, it is highly probable that with one or more of our raw materials, intermediates or finished products, we may well be able to co-operate with you to the same end. May we discuss your problems with you?

non - greasy

NTMENT

JALGESIC Relief of pain and discomfort

within a few minutes and lasting

two hours or more is obtained after the simple, direct application of 'Anethaine' Ointment to the skin or mucous membrane.

'Anethaine' Ointment is non-greasy and is readily removed with water from the skin or clothing. It contains 1.0 per cent. of the fat soluble base of amethocaine hydrochloride.

For the relief of pain in haemorrhoids and skin diseases generally. Many other uses will suggest themselves to doctors.

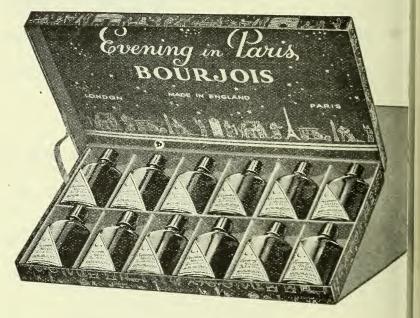

Ointment

FOR over thirty years, through the disruption of two world-wide wars, Laboratory-tested formulae and Laboratory-checked manufacturing processes have ensured the high standards of therapeutic efficacy of all I.C.C. products.

It is this confidence in our products, encouraged and engendered by the honest statements of fact in our advertising, that sends back your customers for further supplies.

We are justly proud that our high standards have, through many difficult times, never been lowered, and we feel we can look forward with supreme confidence to a worth-while future of collaboration between our colleagues in the Trade and ourselves.

You and the public wish for more supplies of Ribena. We wish for more bottles to make it possible.

The new bottle situation is worse than ever. We must rely even more than hitherto on a steady, quick return of all empties. The co-operation of our trade friends has been very heartening, but if any chemists are not doing quite their best, will they please treat this new appeal for Ribena empties as vitally urgent.

Please return them by the same channel of supply and the same route as that by which the full bottles reached you.

HYPOPHOSPHOROUS ACID

Formula — H₃PO₂. Mol. Weight 66.

Properties. A white crystalline solid soluble in water. The hypophosphorous acid of commerce is water. The hypophosphorous acid of commerce is an aqueous solution of this solid acid and is a colourless odourless acid liquid. Hypophosphorous acid is a monobasic acid and possesses strong reducing properties.

Standard. Solutions containing 50%, 31% and 10% W/W of H₃PO₂ are manufactured. The 31% strength should comply with the requirements of strength should comply with the requirements of the British Pharmaceutical Codex (1934) and the 10% (Dilute Hypophosphorous Acid) with the requirements of the British Pharmacopæia.

Uses. Hypophosphorous Acid is used as reducing agent in organic synthesis, as an analytic reagent, in the preparation of other hypopho phites and as a preservative for hydriodic acid.

Packages. Glass carboys and winchester qua

In the management of cardiac arrhythmias, the consistent therapeutic response afforded by Digoxin 'B. W. & Co.' matches the diagnostic precision of the electrocardiograph. Digoxin, obtained from *Digitalis lanata*, is a pure crystalline glycoside of constant composition and activity, needing no biological standardisation. Other important advantages are its rapidity of absorption and excretion and its suitability for intravenous injection in cases of extreme urgency.

NEWS OF THE WEEK

y Chemical Wages Increase.—Agreeas been reached between the Joint du ial Councils for the heavy chemical, and fertiliser industries upon wage as for time and piece workers at the lile in grates: Adult males, 2d. per hour; emales, 14d. per hour; juveniles, ionately. The agreement does not he drug and fine chemical industry.

B Releases.—Since VE-day 129 class have been released from the standard to the standard to the seven have been released from the seven have been released from the ifty-nine from the Army, and sixty-om the Royal Air Force. In addition, mately 560 pharmacists have obclass A release from the Army, but s A figures for the other two services available.

ges in Rates of Purchase Tax.—
s in rates of purchase tax and
ions from the tax announced by the
lor of the Exchequer in his Budget
are explained in detail in Customs

and Excise Notice No. 78E, copies of which are being posted to all registered traders. Notice No. 78E states, inter alia, that these alterations apply to goods which are delivered on sale, or appropriated to retail trade or similar purposes, on or after April 10, 1946. Goods delivered before April 10 by a registered person under a taxable sale (e.g. to a retailer) and goods appropriated by a registered person before that date to retail trade or other taxable purposes are not affected by the tax reductions, and retailers are free to resell such goods at a price to cover the tax they have borne on them. It is not open to registered persons to take goods back from retailers or from their own retail branches and claim a rebate of tax in respect of them with a view to their re-delivery free of tax or at the altered rates. Goods exempted from tax include epidiascopes and cash registers. Goods to be chargeable at 163 per cent. include vacuum flasks and vacuum jars being flasks or jars of a kind used for domestic purposes. Goods to be chargeable at 33¹/₃ per cent. include hair waving and hair drying machines, in addition to photographic cameras, except those specified in Class II (a) (i), photographic enargers, projectors for sub-standard film or for slides, except epidiascopes, lenses and other parts of, and accessories to, such cameras, enlargers or projectors, unexposed sensitised photographic paper, cloth, plates and film except those specified in Class II (d) (ii) and II (d) (iii).

Welcome Home.—Twenty-five members who had been serving with H.M. Forces were present at a social evening at Brighton recently, organised by the Brighton Branch, Pharmaceutical Society.

Pharmacist Councillors.—In the loca, district council elections at Amlwch, Anglesey, recently, Mr. G. F. Weeden. M.P.S., was elected, and Messrs. Llew. W. Jones, M.P.S., Idris Jones, M.P.S., and R. Humphrey Lewis, M.P.S., were re-elected.

Sheffield Whist Drive and Dance.—To conclude the winter session a whist drive and dance was held by the Sheffield Branch, Pharmaceutical Society, on April 3. Messrs. H. Hall and L. Stocks acted as M.C.s, and Mrs. A. A. Jackson (Branch chairman) made the presentation of prizes.

British Pharmaceutical Conference.—The executive has arranged for a meeting, extending over two days, to take place at the Connaught Rooms, Great Queen Street, London, W.C.2, on Tuesday and Wednesday, July 16 and 17. Intending visitors are reminded that hotel accommodation in London is still in keen demand.

Pontypridd Lady President.—Mrs. N. D. Evans who was elected *President* of the Pontypridd Branch, Phamaceutical Society at the recent annual meeting, is the first lady to hold that office. Other officers elected were: *Vice-president*, Mr. C. Davies; *Treasurer*, Mr. T. E. Evans; *Secretary*, Mr. D. H. Lewis.

Association of Tar Distillers.—At the annual meeting of the Association of Tar Distillers held recently, the following officers were elected: President, Mr. S. Billbrough (Yorkshire Tar Distillers, Ltd.); Vice-president, Mr. W. A. Walmsley (Thomas Ness, Ltd.); Treasurer, Captain C. W. Harris (Burt, Boulton & Haywood, Ltd.); Auditor, Mr. E. Hardman (E. Hardman, Son & Co., Ltd.).

Export Estimates Again Up.—Spea 1g at Cardiff on April 5, Mr. H. A. Marq 1d (Secretary for Overseas Trade) said 1t, although official figures for March had ot been finally computed, he estimated at they would total not less than £67 min. This compared with £33 million in the rd quarter of 1945, £39 million in the fit the quarter, £57 million in January and 60 million in February.

Proposed Manchester Reunion.—Men of the Manchester University Chemist and Druggist qualifying class, 1937-38, who reinterested in a proposed reunion Sundate be held in Blackpool in the late summer invited to write to Miss L. I. And n. Corbière, Normoss Road, Newton, F k-pool, Lancs, who will also welcome no of service men and information regarding makilled while on active service.

Blackpool Lectures.—Local doctors iddental surgeons have been presen as visitors at lectures organised by the F k-pool Branch of the Pharmaceutical Sc tyrecently. Dr. F. Wrigley spoke on 'he Later Vitamin Developments' on M ch. 28, and Mr. A. L. Bacharach gave a ke on "Penicillin" on April 2. In a discumbich followed his lecture Mr. Bach stated that he did not think that dispensing of penicillin would become normal practice for retail chemists.

Employee Pharmacists.—A meeting the council of the National Organisatic of Employee Pharmacists was held in Lo on March 25. Delegates reported a meeting with the Organisation Composite of the Council of the Pharmaceutical Sc Dr. H. Davis was appointed to report the Organisation on the Joint Compandad a preliminary draft on emproblems in hospital, retail and indipharmacy was discussed by the work committee.

Scottish Golf.—The first meeting 1941 of the Scottish Chemists' C ng Society will be held at the Gleneagle Course on May 8. Chemists wishi enter for the trophy should send money (5s.) together with particular club handicaps, time of arrival a course, and of meals required (lunchigh tea, or plain tea), to Mr. T. Harsecretary, 11 Mosspark Boulevard, 11 gow, S.W.2 (telephone: Ibrox 1743) 101 later than April 24.

Portsmouth Officers.—At the a lal meetings of the Portsmouth Che ts Association and Branch of the Ph la

c ical Society, held on April 3, the wing officers were elected: Chemists' Aciation: President, Mr. A. G. Bradt; Vice-president, Mr. E. B. Johnson; Jusurer, Mr. W. E. Bown; Secretary, M. F. H. Ruoff. Pharmaceutical Society: (man, Mr. A. G. Bradburn; Vice-man, Mr. E. B. Johnson; Treasurer, W. E. Bown; Secretary, Mr. F. H. F. f.

heft of Drugs.—At Denbigh Quarter Stons, on April 5, Llewellyn Phillips, V. kham, pleaded guilty to breaking into Es, Ltd., Regent Street, Wrexham, and sing drugs. He was bound over for twe months on condition that he became a luntary patient at a mental hospital. A ised's mother, who found under a wardrobottles marked poison, took them to a dor and the matter was reported to the e. There was no suspicion that prisoner win league with anyone for the disposal of derous drugs.

dustrial Information Conference.—The stary, Association of Special Libraries a Information Bureaux (Aslib) states the one-day conference at Manchester of 1y 8 (C. & D., p. 385), is being called to hable industrial organisations to discomutual problems which arise in taining their own information services, at to interest other industrial organisation in creating industrial information seconds cess. There is no intention that the A ciation should itself set up an information bureau.

ort Talks at Durham.—Three short formed the subjects of a meeting of Durham County Branch, Pharmacical Society, on April 3. Miss I. S. Hay setary, National Association of Women macists), spoke on "Women's Place in macy Today"; Mr. G. Agand (a ber of the committee, Durham Branch), sq e on "Life and Pharmacy," and Mr. J. Nichols (a past-president of the Bich), chose as subject "Pharmacy as I. S. Id Like to See It." Votes of thanks proposed to the speakers by Miss hinson, and Mr. G. W. Hudson, and seconded by Miss Bullock and Mr. H. Morgan. Mr. T. Melrose, jun. (vicedent), was in the chair.

w Penicillin Standards.—New regulatic controlling the purity and strength of pillin are contained in the Therapeutic tances Amendment Regulations, 1946. Te regulations were promulgated rect y under S.R. and O., 1946, No. 467, and

replace provisional ones made in August, 1944. The amendment makes the following important provisions: (a) crude filtrates of penicillin are excluded, and the dry acid, salt, or derivative, or a solution of these prepared for parenteral injection, become the only recognised forms of penicillin; and (b) the minimum potency is increased to 300 units per mgm. for solid preparations, and to 2000 units per mil for solutions. The amendment became operative on April I.

Blackburn Meeting.—Mr. W. J. Tristram, J.P. (a member of the Council of the Pharmaceutical Society) gave an address entitled "Pharmacy and the New Health Service" to the North-east Lancashire Branch at Blackburn on March 18. Mr. Tristram (chairman, Joint Committee on a National Pharmaceutical Service), paid a tributeto the work of its members and added that, though different viewpoints had been expressed, the Committee had functioned harmoniously and efficiently. After explaining details of the proposed new health service, Mr. Tristram concluded by answering questions from members. Mr. Emeric Eccles (president of the Branch) was in the chair.

Snarshots Indoors.—Mr. Stanley Schofield gave a lecture entitled "And Now Snapshots Indoors" to a joint meeting of the West London Branch, Photographic Dealers' Association, at the Wellcone Foundation recently. He showed the use of different lighting effects produced by various compound reflector arrangements, with actual demonstrations on the stage, and the negatives after processing were examined later. The showing of a Kodachrome cine film which had been made indoors by the speaker brought the evening to a close. A vote of thanks to Mr. Schofield, and to the directors of the Wellcome Foundation, was given by Mr. J. Howard Evans.

Raw Material Changes.—Coinciding with the transfer of the Raw Materials Department to the Board of Trade (C. & D., April 6, p. 425), the Treasury has made certain alterations in the charges levied on the stock or production of various raw materials. Among these, the following should be noted. The charges for sulphate of ammonia are to continue, but in future they will be collected by the Board of Trade. Remittances and correspondence should continue to be directed to the Directorate of Nitrogen Supply, 3 Buckingham Gate, London, S.W.T. The sulphuric

the

the

acid charges are abolished, but responsibility for the collection of outstanding charges is transferred to the Board of Trade. Correspondence should continue to be directed to Sulphuric Acid Control, 166 Piccadilly, London, W.1.

Activity in Cornwall.—A revival in organisational activity in Cornwall was commenced at a meeting in Truro March 24, when Cornish Branches of the Pharmaceutical Society and of the National Pharmaceutical Union were re-formed, and the following officers appointed: Pharmaceutical Society, Chairman, Mr. A. C. Cannon, Vice-chairman, Mr. S. E. Wilks, Treasurer and Secretary, Mr. W. F. Jewell. N.P.U., Chairman, Mr. A. T. Opie, Vice-chairman, Mr. G. D. Jackson, Secretary and Treasurer, Mr. A. C. Cannon. Secretary, Comich Preprint Mr. A. C. Cannon. Secretary, Cornish Branch, Proprietary Articles Trade Association, Mr. W. F. Jewell. Earlier in the afternoon members heard lectures on the dispensing of penicillin by Messrs. L. H. C. I. Bryan and J. C. Smith (City Hospital, Plymouth). A vote of thanks to the lecturers was proposed by Mr. J. C. Pearce, and seconded by Mr. W. H. Treglown.

Distribution Census.—A White Paper has been published giving details of how the census of distribution for 1948 is to be carried out and the type of information it is desired to obtain. The first main census in respect of the year 1948 should be taken in 1949, states the Committee responsible for the White Paper, and should not attempt to cover more than the distribution of goods and closely related service trades. Thereafter, a main census should be taken at least once in every five years. The schedule to be filled in by small retailers should be as simple as possible. Information to be required from all retailers of whatever size should be limited to description of business, length of ownership, number of shops operated, number of workers employed, wages paid, annual value of premises, rates and categories of goods or services supplied, turnover, number of delivery vehicles, and floor space. Large retailers should be asked further to give total cost of goods purchased, details of stocks and book debts, main classifications into which their turnover is divided, and costs of collection, delivery and advertising. Wholesalers and service traders should be asked for information broadly similar to that set out by retailers. When the decision is finally made to take the census, co-operation should be sought from trade organisations, and a broad idea should be gi 1 a the probable obligations of traders, the recommended that a "pilot" census bul be taken as soon as possible in or t determine the best method of takin the full census. (Editorial comment, p.).)

IRISH NEWS

Northern Ireland Health Service. The Northern Ireland Minister of Healtl ave an assurance, in the N.I. House of Cor on on March 28, that the people of Notice Ireland would receive health s ices "equal to those in Britain." "It do not mean," he went on, "that we are in up the same street, but we are go to arrive at the same destination."

During the year, it wasre tel surgical goods to the value of £35 ha eet made available by the branch the Medical Missionary Sisters of lar Speakers included Mr. P. A. Brady icepresident, Pharmaceutical Society Ire land), and Mr. D. J. Nugent.

Students' Debate.-Impromptu (ate arranged by the Pharmaceutical Stant Representative Council took pla Dublin on March 21. Mr. F. X. M he (a member of Council of the Pharmac in Society of Ireland) who presided wa welcomed by Mr. Seamus Fox (st into chairman). Mr. Costelloe (president rise Drug Association) and Mr. G. C. Veil were also present. Prizewinners were irs Mr. John E. Burrell; second, Mr Di. Cronin, followed closely by Mr. Tall O'Connor (students' secretary).

Belfast Penicillin Lecture.—Mr. Bacharach, M.A. (a vice-president Royal Institute of Chemistry, and Society of Chemical Industry) galecture entitled "The Propertie and Preparation of Penicillin" to a mee galecture the Pharmaceutical Society of November Ireland, in Belfast, on March 22 The president (Mr. James McDowell) refer to Mr. Bacharach's close association we the onal subject of the lecture, and to his nut and other interests. The speaker ex specimens of pure penicillin II (sodium salt) made in England duri and after the war. A series of lanterr ideillustrated in detail the processes ir in manufacturing penicillin, from the bild plant to full-scale production. A pr tion was made to Mrs. Bacharach.

LEGAL REPORTS

(pany Director Sent for Trial.—At ma brough Street, London, police court rec y, Samuel Charles Bolsom, company din r, Portsea Hall, Edgware Road, who was leged to have boasted that he had got zens of men out of the Army and had hundreds of others, was committed for all at the Central Criminal Court on the soldiers reled on insufficient medical grounds (see & D., March 2, p. 260). He was not charged with attempting to bribe a decive inspector with a gift of £100. Belt pleaded not guilty, reserved his left; and was allowed bail in £100.

e-mark Injunction.—In the Chancery n, London, on April 5, Herts aceuticals, Ltd., Welwyn Garden ity owners of the trade-mark Nivea), out an injunction to restrain Mr. Gwyn it, tes, trading as the Dunraven Phartaca Tonypandy, South Wales, from off toilet cream, not of plaintiffs' curre, under the name Nivea. For the aintiff company it was announced that ir. Jones had agreed to treat the act as the trial of the action and to to the injunction. For Mr. Jones it was urged that such infringement of the lark as had occurred had been quite and it. The order asked for was made with ests and an inquiry as to damages.

Cluetics "Off the Record."-Cosmetic ale escribed as "off the record" were ner ned at Old Street, London, magiscourt on April 5, when Fuller im n, Ltd., manufacturing chemists, y Road, E.C., and Dundas Simpson ing director of the company) were total of £1,455, including costs, for w intent to deceive," and for failing nses were admitted. The company lered to pay five fines of £50, with 52 ps. costs, and Mr. Simpson was to pay three fines of £250, one of 800 and one of £50 as well as £52 10s. costs. en days was allowed for payment. off the record " sales had been, said Coms and Excise spokesman, difficult ect because one had to go all over he entry, and retailers were reluctant to vidence. The defendant company ployed a traveller who sold goods for her but when the invoice was issued it r a considerably less quantity of than were actually sold. For

example, one invoice showed one doz. eyebrow pencils and one doz. mascara, though the retailer actually paid six times the amount on the invoice. The Customs authorities had been to thirty retailers in over a dozen towns, and all had made statements to the same effect. Apart from the evasion of the tax stated, there were certain purchases which the defendant had made that were not recorded anywhere the books of the company. It was known that defendant had bought 912 gross of boxes for which he personally paid £789 and the Customs knew, on defendant's own admission, that many of those boxes had been used in the sending out of goods from the company. This meant that certain sales had taken place which had not been recorded. For the defence it was stated that Mr. Simpson much regretted the offences and accepted full responsibility. The magistrate said he was satisfied that Mr. Simpson had full knowledge of what was going on. A flagrant breach of the Statute had been indulged in and he had grave doubt whether he should not send Mr. Simpson to prison.

INQUESTS

Forty Aspirins.—At an inquest on a young soldier at Durham recently, it was stated that after admission to hospital, the man admitted he had taken forty aspirin tablets. A verdict was returned in accordance with the medical evidence.

Disinfectant Suicide.—A verdict that death resulted from the taking of Jeyes' fluid while of unsound mind was returned at an inquest at the County Home, Loughrea, Eire, recently, on an inmate who was stated to have taken nearly a pint of the fluid.

Death from Insecticide.—At a Formby, Lancs, inquest on a farm labourer on March 22, the coroner said: "It is thought this man died from a concentrated emulsion for dealing with mushroom fly." It is understood that the preparation was one containing DDT.

Slug-killer Death.—At an inquest at Ellesmere Port, Cheshire, on March 7, a verdict was returned that Patrick Murphy, farm labourer, died from the effects of poisoning with tablets comprising a solid fuel used as a slug and weed killer, there being no evidence to show his intentions.

APPLICATION FOR DISCHARGE.—G cld Octavius Jones, M.P.S., "Beech d. d. Edwardsville, Treharris, Glamorga formerly carrying on business at The S Treharris. Bankrupt's discharge g as from January 10, 1946, subject consenting to judgment being e against him by the Official Receiver for (consent filed).

TOPICAL REFLECTIONS

TI F.B.I. Conference

e subject of the two-day conference lay held under the auspices of the Foration of British Industries (p. 442) is no to which you have devoted attention on time past. In a sense it may be sathat the distinguished men of science we on March 27–28 discussed scientific rech in industry were preaching to the creted. They, and the associations and tries they represented, are well aware of e facts and inferences admirably set in the Nuffield College "Statement" and August of that year. The conference was not, however, the less necessary on at account. After two years a freshing of people immediately concerned, with an agenda designed to focus attention on ration aspects of the general problem, was not all grounds desirable; and I trust this kind of conference will be repeated at itable intervals. There is a further colleration. However firmly established the bilaboration between science and industry hay be, there will still be a residual ince in high places to be overcome: I be to persons of influence in spheres are scientific nor industrial. They will ne to be educated into becoming, in their and degree, willing helpers of both scie and industry; and this process is like to be a lengthy one.

Br lian Trade

two pages of your last week's issue (p 144-45) I noticed the mention of four ances produced in commercial quantit in Brazil—menthol, ucuuba wax, py hrum, and carnauba wax. When this va country develops its potential resources on scale comparable with that of present stards in, say, the United States, the is certain to become aware of the fact. The rea of Brazil, 3,298,870 square miles, ater than that of Australia. According Thitaker's Almanack, "the minerals are ery considerable and valuable. . . . The immense iron deposits have been see ly touched . . . and there are important deposits of monazite sand." Among the ief products named in the same book are ffee, sugar, raw cotton, cocoa, oleaginou uits, and rubber. Strange to relate, the iseful Whitaker does not mention ipc uanha, which in the drug trade ranks immong Brazilian exports. A table in one your Trade Reports that I have just cor across gives the value for the year

specified as 2,089 contos out of a total of 2,264 contos for all medicinal plants and resins exported from that country. Though there is a reference to "igpecaya" in Purchas's "Pilgrimes" (1625), the credit of being the first country in Europe to import the root is generally given to France. Pomet, writing in 1694, states that he saw it in the shop of a Paris apothecary more than twenty years earlier: the accepted date is 1672. The story of the use of the drug by Helvetius and of the purchase of his secret on behalf of Louis XIV is well known. Thomas Dover's combination of ipecacuanha and opium was one of the lucky hits of medical practice.

Wiser This Time?

The subject judiciously discussed in your editorial article on p. 437, and in the recent memorandum of the Association of British Chemical Manufacturers (p. 430), concerns every British citizen. Certain proposals of the Control Commission are, as you remark, "most disquieting." Are the lessons of 1919–39 on German scheming to be ignored? In your issue of June 21, 1919, you quoted extensively from a statement by the Allies of that year on the guilt of the Germany of 1914-18. A few sentences from that indict-"For many ment are worth recalling. "For many years," we read, "the rulers of Germany, true to the Prussian tradition, strove for a position of dominance in Europe. . . . They required that they should be able to dictate and tyrannise to a subservient Europe, as they dictated and tyrannised to a subservient Germany." Among other methods, as we know, was commercial penetration. enetration. With it went propaganda. They sought to sow hostility and suspicion instead of friendship between nations. They developed a system of espionage and intrigue which enabled them to stir up internal rebellion and unrest, and even to make secret offensive preparations within the territory of their neighbours. . . . They kept Europe in a ferment by threats of violence. . . ." After a reference to German treatment of prisoners of war, the statement continues: "Justice, therefore, is the only possible basis for the settlement of the accounts of this terrible war." On reading this and more to the same effect, one thinks of the sequel-of the highpressure salesmanship of German goods to which you refer, and of riding rough-shod over trade competitors—all part of the same sinister policy. THE WEEK IN PARLIAMENT

By a Member of the Press Gallery, House of Commons

In the House of Commons on April 1, MR. W. SHEPHERD asked the President of the Board of Trade if he was aware that since the removal of the ceiling price for carnauba wax, the price had soared to over £700 per ton; and whether he would confer with the United States with a view

to appropriate action being taken.

MR. BELCHER (Parliamentary Secretary) replied that the limitation of prices depended on the control of imports which for the United States was withdrawn after VE-day. He had no reason to think that the U.S. authorities would now be prepared to reimpose the control, but the price might be expected to fall again with slackening of the present abnormal demand and increase in the supplies of substitutes. Replying to a supplementary question also by Mr. Shepherd, why he had permitted re-exporting of carnauba wax a few months ago, when the price was almost half what it was today; and whether he was aware that this was causing us loss of currency, he said he was unable a few months earlier to forecast what the price was going to be today.

Alleged Worthless Fertilisers

Mr. Gooch asked the Minister of Agriculture whether he was aware that the sale of unsatisfactory and in many instances worthless fertilisers had reached such proportions as not only to defraud the public, but also to imperil the production of home grown food; and whether he would remove the present inability of the authorities, under the Fertilisers and Feeding-stuffs Act, 1926, by securing that the existing statutory power to institute criminal proceedings upon samples taken on manufacturers' premises was extended to samples

taken on the premises of purchasers.

MR. Tom Williams: I have no evidence that there has been any marked increase in the quantity of unsatisfactory fertilisers offered for sale to farmers, but if Mr. Gooch will let me have any information in his possession supporting his allegation I shall have inquiries made. I can give no undertaking that legislation amending the Act will be introduced in the near future.

Surgical Bootmakers

On April 2 Mr. Paton asked the Minister of Labour if, in view of the long delayamounting to about six months-before surgical boots and appliances and artificial limbs could be supplied to those re them, he would defer any further calle the skilled workers engaged in makin sur appliances and accelerate the release such workers in the forces.

Mr. Isaacs: I am aware of difficulties in connexion with the pro time of surgical boots, appliances and a ici limbs, and am considering, in const to with the interested Government ments the possibility of deferring t cal up of members of the 1926 or earlier who may be employed on this wo is already open to an employer to prothrough the appropriate Government for the release from the of any particular man who is a key sy in this work.

Toilet Supplies from Overseas

Toilet preparations and requisites e be imported from Canada under a m fice tion of Government policy and no recently by Mr. Marquand (Secret 10) Overseas Trade). Mr. Marquand : the Overseas Trade). Mr. MARQUAND: Government had considered the policensing system in order to see who tell could be taken, within the limits dict db the United Kingdom's balance of pa en position, to reopen established tra conexions at present interrupted in tarcategories of manufactured goods fo no import licences were being gran "So long as balance of paymen in

culties continue, the free flow of imp s those classes of goods which it is not enter to import clearly cannot be contempled said Mr. Marquand. "It would, me wa be inequitable to resume imports: where United Kingdom manufactu sa present prohibited or where it is rect cve so heavily as to render inappropria a very limited flow of imports. I as where United Kingdom manufacture have been forced for any reason to con in t special standards or specifications, ma be necessary to impose similar rest ions In these circumstances, the Govemen have decided that, with due regard economic and financial condition that prevail, it would be desirable to mit within the above mentioned limition small amounts of manufactured g s present completely excluded. It is i and that this relaxation shall apply to of specified goods from countries the maj be willing to operate the necessary a line trative arrangements, and whose und yin na al arrangements with the United (in m make such relaxations possible, so imported will be subject, with any ec ry modifications, to the arrangener for price control which are applicable

or price control which are applicable of lar goods produced in the United (in m'.

A rdingly, where it could be shown to overseas manufacturer of a parcial class of goods had an established for those goods in the United (in m before the war, applications for licences on the basis of approximations). mp licences on the basis of approxim-tel per cent. of the value of his pre-war rad rould be favourably considered. The ecc ry arrangements to meet this requirenen would be worked out with the ov ments of the countries concerned, and by had already been worked out in

he e of Canada.

G s on the list would be admitted on he he basis from any other country to this the scheme might be applied. qu', any additions to the list that might e epted by the United Kingdom ov ment would be applicable to all the our es covered by the scheme.

M Marquand circulated a statement yi that arrangements had been worked th the Government in Canada to small flow of imports to be known cen imports "in respect of a selected nanufactured goods. Public notice be given of any additions to the list. pp tions for licences to import the te goods from Canada would be conder only when accompanied by a certifite om the Canadian Department of ac and Commerce identifying the goods at ere the subject of the application ith e output of the specified Canadian an cturer. Such a certificate should be pl for by the Canadian manufacturer goods or by his export agent in and when obtained, should be sent importer in the United Kingdom, to buld then make application for the policence. The new procedure does not fee existing procedure for goods not by the new policy.

oo o be included under the scheme are:
Su pus' rubber gloves.
I for photographers' use.
To preparations: Tooth-paste and pow-

ct, tick and rouge, face powder, Vaseline rouse, hair tonic and brilliantine, and brilliantine, and rouse rousestes. requisites.

hir Reading of Patents Bill.

Tipatents and Designs Bill (Lords) was ive 1 unopposed third reading on April 5.

HEALTH BILL ITEMS

conference of representatives branches of the Pharmaceutical Society and National Pharmaceutical Union, and of the Pharmaceutical Committees, took place in London on April 9. The Press was admitted only as observers. An official report of the proceedings was not available at the time of going to press. At a Press conference held on April 10 it was made known that the Joint Committee would not oppose the Bill on any major issue. The Committee would urge that there was no necessity to institute pharmaceutical departments in centres, existing facilities being capable of development to meet all needs.

Motion for Rejection

Discussions between the Government and the Opposition over the procedure to be adopted in presenting the National Health Service Bill in the House of Commons are understood to have resulted in a decision to postpone the second reading until immediately after the House of Commons returns from its Easter recess on April 13. The text of the Opposition's rejection amendment is as follows :-

"That this House, while wishing to establish a comprehensive health service, delcines to give a second reading to a Bill which prejudices the patient's right to an independent family doctor, which retards the development of the hospital services by destroying local ownership, and gravely menaces all charitable foundations diverting to purposes other than those intended by the donors, the trust funds of voluntary hospitals, and which weakens the responsibility of local authorities without planning the health services as a whole."

Hospital Opposition

The Board of Glasgow Royal Infirmary has passed a resolution recording, as the second largest voluntary hospital in the United Kingdom, its profound disappointment with, and disapproval of, the terms of the National Health Service Bill and its belief that the Bill will destroy existing machinery of democratic control of the Hospitals and will vest in one individual, the Minister of Health, dictatorial power.

Dr. Charles Hill (secretary of the British Medical Association) has denied a report that the British Medical Association has informed the Ministry of Health that 17,900 practitioners would enter the new service. The figure mentioned was the Government

actuary's theoretical calculation.

TRADE NOTES

Prices Approved.—The Central Price Regulation Committee has approved selling prices for Laxobac, manufactured by E. Griffiths Hughes Ltd., Adelphi, Salford, 3, Manchester.

Dropper Bulb.—An announcement concerning Spandit dropper bulbs and washers Dulin synthetic rubber for the medical profession is made in this issue by Empire Rubber Co., Dunstable, Beds.

COUNCIL CANDIDATES

Brief biographical details about some of the candidates who are standing for election to e Council of the Pharmaceutical Society, May 15, 1946, with summarised statements of po

DAVIS, Charles

QUALIFIED 1898, from Liverpool School of Pharmacy. Served term as manager, Symes & Co., Liverpool. In 1906 took over old-established business at Leamington. Served on local town council for twenty years. Now an alderman. Was mayor for two years. Chairman,

Warwickshire Insurance Committee, secretary, Warwickshire Branch, National Pharmaceutical Union, and Warwickshire Pharmaceutical Committee. Chairman, Warwick Joint Hospital Board, for eight years.

Policy :-

I consider that not only dispensing but the distribution and sale of drugs and all medicinal products should be under the control of the pharmacist; that full cooperation should be given in carrying on the proposed National Health Service but that an upward revision of chemists' remuneration is essential, as soon as possible. I consider the present educational system in pharmacy requires careful revision and amplification, and that the "Pharmaceutical Journal" should be more generous in giving space to matters of general interest to our calling. I feel that the Pharmaceutical Society, whilst honouring its statutory obligation, should protect its own members to the fullest extent (protection rather than prosecution). I should like to see all members making a contribution to the Benevolent Fund as part of their fees. I consider the Society should continue to increase its efforts to obtain proper recognition of pharmacists by the authorities, including the Armed Services. A review of the Society's financ.al position with a view to a reduction in expenditure is imperative.

ISLIP, Mary Cater

A MEMBER of Council since January 1945 and the only hospital pharmacist on the Council. As honorary employment secretary, National Association of Women Pharmacists, and having worked in close contact with the Central Pharmaceutical 'r Committee during the war, I have ga d an extensive knowledge of condition n

pharmacy and feel that this knowledge can be of great value to the Council and members of the Society.

My policy, summarised, is as

follows :--

All dispensing for the pharmacist.
 Good working

conditions and remuneration. These are essential if the pharmacist is to give the best post

service to the public.

3. A clear-cut educational policy. Resociety's Intermediate examination shifts be discontinued, and only a University Intermediate examination accepted. Moreover, which is a solution to the qualifications in addition to the chemist and Druggist. At present sepharmacists are debarred from taking a B.Pharm. or B.Sc. degree because they not passed a University Intermed examination. There must be every optunity to keep abreast of scientific deverments, therefore the Council should:

(a) Arrange refresher and post-grad e courses at times and places convert

to members.

(b) Keep members informed of stific developments through its varies

publications.

4. Each section in pharmacy has its to play and co-operation and understan between these sections is essential. It is my aim to further this. I believe that the retail pharmacist—provided that the repharmacist is prepared to give the servican work side by side with the hocentre, and it will be my endeavour to that he has the opportunity of doing the

MURRAY, Ronald MacDonald

QUALIFIED 1921. Had varied ex ence in London and Glasgow. For twenty years employed with W. T. Colti M.P.S., Middlesbrough. A former p dent, Middlesbrough Pharmacists'

ion, and local secretary, Proprietary cles Trade Association. Since 1933, etary, Tees-side Branch of the Pharma-

ceutical Society. At pre-war the last Conference elected Branch Representatives' delegate to with the consult Society's Council. Folicy:

I. The Society's policy must be controlled by members wholly occupied in pharmacy, otherwise there is a danger of its source of power being sepa-

d from persons influenced by its power. ss this is well watched, the Society in time tend to acquire a life and a interest of its own distinct from the boses it should fulfil.

The Society must remain master in its household, and not accept any dicta-

from its "lodgers."

At present, National Health Insurance ensing occupies four-tenths of the age pharmacist's time and contributes two-tenths of his income. In fairness uture students, who will rightly regard qualification as a passport to a profes-, rather than as a passport to a business enture, the present fee should at least toubled.

We require for pharmacy a negotiating mittee consisting entirely of pharma-.

who will

(a) take the narrow and difficult part fighting for our rights, rather than

(b) take the broad and easy path of cepting what is offered.

While pharmacists have made headin public relations greater activity is lired in this direction to make the public erstand that we are entitled to the things which we stand and which we claim.

Greater freedom should be granted pharmaceutical Press in reporting

ncil activities.

D, Thomas

seeking re-election, after a few months a co-opted member of the Society's ncil, I place my experience unreservedly he disposal of pharmacy. As manager ne of the largest dispensaries in the ld I am familiar with every problem confronts all who are engaged in il pharmacy. I have served branch pharmacy over a long period as chairman and secretary. Our future is completely overshadowed by the part we shall play in

the new health services. All, or nearly all, dispensing will be done by pharmacists. The voice of united pharmacy must and shall secure adequate remuneration for professional service. and representation at every administrative level. Council, assisted by the Branches and the Branch Repre-

sentatives' meetings, must evolve short and long-term policies covering, amongst others, the following pressing problems :-(a) Refresher courses so that we can

all be ready to play our part.

(b) Careful control over the mounting cost of the Society's College until our educational policy has been decided.

(c) Reasonable reinforcement of the "spirit" as well as the "letter" of the

code of ethics.

(d) Wise planning to ensure that the increased cost of the new building does not bring about an increase in retention I oppose such an increase.

(e) Careful revision of the Charter to secure advantages for all without preju-

dice to existing privileges.

I shall oppose any by-law that has not the full approval of a Branch Representatives' meeting, and shall, if re-elected, work continuously for pharmacy as a whole and never for sectional interests alone. Correspondence and questions will be welcomed.

ULSTER ASSOCIATES' DANCE.—Back row, Mr. J. Anderson, Miss J. Godfrey, Mr. J. Hunt, Mrs. E. H. Barr, Mr. H. W. Gamble, and Miss J. M. Taylor. Front row, Mr. J. G. McGivern, Miss J. B. Devlin, Mr. T. A. Gibson (president, Ulster Chemists' Association), accompanied by Mrs. Gibson. by Mrs. Gibson.

VOI XLV

APRIL 13, 1946

NO. 3453

he Second Post-war Budget

No or the first time has a tax originally imi ed as a temporary measure and applied for specific purpose later been declared like to be continued indefinitely. In the coul of his Budget speech in the House of on on Tuesday the Chancellor of the tx quer, Mr. Hugh Dalton, when dealing wit he subject of purchase tax, indicated ha his impost will have to be maintained ner to raise revenue to help pay for the os f increased social services. The tax was f course, originally introduced as an ment to economy; the revenue side of i as quite incidental. To make matters the Chancellor said he proposed to free the tax certain classes of goods, ing "public clocks with dials not less that wo feet in diameter," while on other class of goods, such as gramophones and of goods, such as gramophones and mulal instruments, the rate of tax is to be uced. There is to be no relief from this inquitous tax on medicinal products anche high rates at present charged on oth classes of goods of the drug trade, such as metics and toilet perfumes, are to be con ued unchanged. The interests which hav persuaded the Chancellor to cancel the ix on some classes of goods and sub intially to reduce it on others must hav put forward convincing facts in sup t of their appeals. Whatever evider was submitted in support of these religit could not have been anything like ong and overwhelming as that which

could be adduced in support of a reduction, if not cancellation, of the tax on medicines and similar essentials. The only items of direct drug trade interest in the Budget is a reduction in the rate of purchase tax from 100 per cent. to $33\frac{1}{3}$ per cent. on photographic goods.

The main features of the Budget statement may be summarised as follows. Income tax: The cut in the standard rate conceded last October is only now taking effect. In addition the earned income allowance is to be increased from one-tenth to oneeighth, with a maximum allowance of £150. The benefit will not commence to operate until October, when the whole year's concession will be allowed. A special income tax allowance of file is to be given to married women employed in industry; formerly the amount was £80. Contributions to the national insurance scheme are to be exempt from the tax. Estates of less than £2,000 will in future be free of Death Duties; on the other hand the rates of tax to be levied on estates of £15,000 and over are to be raised.

So far as general trade and industry are concerned, the Chancellor's proposal to abolish Excess Profits Tax at the end of this year will be received with satisfaction. For the remainder of 1946 the tax is to continue at the rate of 60 per cent. This decision is the outstanding feature in Mr. Dalton's proposals. The National Defence Contribution is to be retained under the title of "Profits Tax." Except for the forthcoming cancellation of E.P.T. there is nothing held out as inducement to encourage industry to concentrate on exports.

The general impression of this "Go slow on tax relief" Budget is that, while efforts have been made to spread the small reliefs so that everyone will benefit a little it may be said that they are the minimum that were anticipated. Expenditure for the coming financial year is estimated at 31 per cent. less than in 1945-46, and this sharp fall might have allowed for a further reduction in the general rate of income tax and other reliefs but for the fact that the Government estimates of the civil departments have been increased by £145 millions, principally for social services. With the further reduction in the cost of the upkeep

of the armed Forces and the money that will come in from the sales of surplus stores it is felt that the Chancellor has perhaps been rather over-cautious in not taking into account the brighter prospects ahead.

How Products Reach the Consumer

In recent years this country has lagged behind the United States (and possibly other countries) in the knowledge made officially available about means and channels of distribution of consumer goods. That the Government should carry out a periodical census of distribution was constantly urged by private members in peacetime Parliaments, but successive cabinets appeared insensitive to the suggestion. A changed attitude came about during the lifetime of the war-time Coalition Government, probably as an essential consequence of its shouldering the responsibility for maintaining full employment, so far as possible under peace-time conditions. Two committees were set up under Mr. Oliver Lyttelton, the then President of the Board of Trade, one dealing with the existing census of production and how it could be improved, the second to investigate whether a census of distribution was in fact, practicable. The first committee reported in October 1945 (C. & D., November 3, 1945. p. 462).

Unanimous Recommendations

The report of the second committee is now available (p. 452), and among its recommendations, which were unanimous, are some constructive proposals of farreaching importance. First among them obviously is the main Committee's finding that the census is not only desirable, but, in fact, necessary. It would present invaluable information to manufacturers and wholesalers particularly, but also to public (including town-planning) authorities. economists, and even politicians. secure the fullest advantage from the enterprise, it is proposed that the census should cover a wider field than actual distribution, taking in also transport, warehousing, advertising and catering, among other things, and supplemented with data relating to wages, costs, turnover, etc. In fact, it is recognised that the full usefulness of the census will develop very experience rather than exist from the standard Exploratory work, accordingly, in the very of a "pilot" census, should be done at earliest opportunity.

Trade Associations' Help

The Committee is to be congratulated a recognizing the contribution that the associations can make in shaping the father census should eventually take, type of information that will be a valuable, and so on. The length of interpretation to be a matter experience to decide, the initial suggestable for a main distribution census experience to decide, the initial suggestable for a main distribution census experience to decide, the initial suggestable for a main distribution census experience to decide, the initial suggestable for a main distribution census experience or four years, with "sample" sure in the intervening periods.

It hardly needs to be pointed out speed of presentation of results is vital usefulness of the project, and that organisation will have to be built up dealing expeditiously with the mat collected. In this again the trade assetions may be able to render valuable a tance. The next step is with the Govment, which has announced, through Lord President of the Council in the H of Commons on March 25, its accept of the Committee's proposals.

Report on Potent Medicament

The interim report of the Technical (mission of Pharmacopæial Experts revie on p. 470 of this issue is a valuable the brief contribution to a subject of in national importance that has been discuid for many years past. It shows a t appreciation of the nature of the prob and may serve as a model for full exploration. By inference it raises question of the future of the Commis a body working in discouraging circlstances for most of the time that s elapsed since its formation in 1937. It be presumed that this efficient organisa will be taken over by the United Nat 5 Assembly as one of the assets of the Le of Nations. As will be seen from r review, the personnel of the Commission s been reduced by deaths from seven to members. It is clear that these gaps it be filled before a substantial increase or present pace of the necessary research be expected.

CHIEF OFFICIALS OF DRUG AND PHARMACEUTICAL ORGANISATIONS

r. HENRY E. CHAPMAN, M.P.S., F.C.S., Barrister-at-Law, J.P. Secretary, Proprietary Articles Trade Association

No. 5. Specially drawn from life for The Chemist and Druggist

PHARMACEUTICAL SOCIETY OF GREAT BRITAIN

The Council of the Pharmaceutical Society of Great Britain met in London on April 3, the president (Mr. J. C. Young) in the chair. The President announced with regret the death of Mr. Frank Browne, a former member of the Society's staff. Mr. Browne, he said, had been an outstanding pharmacist and was renowned for his kindliness and sincerity.

The retirement of Sir Malcolm Delevingne from the Council was also announced.

In a letter Sir Malcolm Delevingne wrote: "I shall leave the Council with great regret. You have all been exceedingly kind to me during my years of office, and I have felt at home in the friendly atmosphere which has prevailed in the Council." The President said that all the members of the Council would regret the loss of Sir Malcolm Delevingne's services, and the general feeling of regret and appreciation was further expressed by Messrs. McNeal, Parry, and Davis. A resolution expressing this feeling was unanimously passed.

The Secretary reported the resignation of Mr. G. R. Hill, on medical advice, from the chairmanship of the Society's Statutory Committee. A further postponement of the Committee's next meeting would be necessary, as Mr. Hill's successor had not yet been named, and the Privy Council had been unable to appoint a temporary chair-

man at short notice.

National Health Service

Reports were placed before the Council of meetings of the Joint Committee on a National Pharmaceutical Service held on March 6 and, with added members, on March 25. Full discussion ensued on recent developments, and on future action. In accordance with the decision of the original bodies represented on the Committee, invitations to join the Committee had been extended to other organisations, and the following additional bodies were now represented on the Committee:—

Scottish Pharmaceutical Federation

National Association of Women Pharmacists Co-operative Congress Parliamentary Committee

National Organisation of Employee Pharmacists

Guild of Public Pharmacists

Association of Pharmaceutical Employees Association of Scientific Workers

National Union of Distributive and Allied Workers

National Pharmaceutical Employees' Union Socialist Medical Association (pharmaceutical group) National Co-operative Managers' Assemble (managing chemists' group)

Dr. R. Clitherow, M.P., Sir v. Wakefield, M.P., and Sir Dymoke 11t Bt., M.P., had also accepted invitat 5 join the Committee.

Registration

The Secretary reported that, sin the previous meeting, twenty-six person have registered as apprentices or stimmaking a total for the year of ninety unthere had been thirteen application restoration to the Register. Two a tions had also been received for regis junder the reciprocity agreement, but anything the secretary of the reciprocity agreement, but anything the secretary of the reciprocity agreement, but anything the reciprocity agreement and the reciprocity agreement.

Educational Concessions

In the minutes of the Education ma mittee, which were received, it was relief that four candidates had been grante on cessions during March in the Intern late examination and two in the Chemi and Druggist Qualifying examination. Committee had considered a letter in group of Service pharmacists asking where special examination in pharma ici could be set to enable ex-Service chaist and druggists to qualify as Pharmac lead Chemists. The attention of these me was drawn to the Government sche for further education and training, and was pointed out that those whose stud for the Pharmaceutical Chemist Qualing examination had been interrupted the Chemist and Druggist stage would : ear to be eligible for a grant under the to enable them to complete the qualification

MR. KNOX MAWER also reported the outloop hospitals that wished to take pharr entical pupils had been approved in resistent pupils concerned, and a fifth defor inquiry. Approval of fifteen phar is had been granted—" a small number there was usually a falling-off at this me

of the year."

Recommended as Honorary Member

MR. W. S. Howells, in submitting report of the Establishment Committee that his Committee recommended the Malcolm Delevingne and Sir Verlangdon-Brown be selected as how members of the Society at the May more of the Council. The secretary had authorised to make arrangements for a modating the museum specimens herbarium, released from war-time st.

Mo for Research

for Research

L. M. Parry, referring to the minutes
Joint School Committee, suggested
are might be a possibility of obtaining
from the Government for the purfresearch. Research was the lifethe nation, he said, and with a live
ment he thought it should be possible
ain money for that purpose. It was
determined that the Therapeutic Research
cor ation, Ltd., had granted Professor
Lin 1 £1,200 for purchase of apparatus.
Thinace Committee reported that it
proved a proposal that a member
as over seventy years of age and not
egg the granted professor
that the proved a proposal that a member
as over seventy years of age and not
the egg the proved a proposal that a member
as over seventy years of age and not
the report was received.

Org sation

Organisation Committee recom-ner d that a Branch Representatives' nee g should be held in October 1946, and lat a letter should be sent to the Nat al Organisation of Employee Phar-nac's expressing the Council's interest in the ssociation and wishing it success.

The recommendations were received. Mr. F. G. Wells, in presenting the report, said that many branches found that the money granted to them was not sufficient for their needs, and his Committee recommended that a report should be made to the next meeting of the Committee on the question of increasing the amount of the branch grant per head.

Law Committee

The report of the Law Committee, presented by the President in the absence of Sir Malcolm Delevingne, showed that the premises of 1,134 authorised sellers, 137 listed sellers and 472 drug-store proprietors and similar traders had been visited by the Society's inspectors and agents. Fourteen cases of alleged infringements had been considered and appropriate action taken.

Privy Council Appointee

Authority was given for the Society's seal to be affixed to a diploma conferring honorary membership of the Society on Dr. B. A. Young, recently appointed to the Council by the Privy Council.

NORTH BRITISH EXECUTIVE

TING of the Executive of the North Brit. Branch of the Pharmaceutical was held in Edinburgh on March 27, Mr. hn Anderson in the chair.

Obi ries

Chairman mentioned that, since evious meeting, no fewer than four ers had been lost by death. All their various capacities, rendered service to pharmacy. Professor Stockman, whom they had known as vy Council Visitor to their examining in Scotland, had always carried out the rendered service to the examinations of the examinations had been a frequent contributor to their examinations. The scotland is a frequent contributor to their examinations are frequent contributor to their examinations. The scotland in earlier years, a scientific meetings. Dr. Tocher, a siliant all-round "man, had always a keen interest in pharmaceutical tine, and it was good to know that mory was perpetuated in the Tocher and scholarship. For twenty-five Mr. Harvey P. Arthur had been a er of the Executive, and had been the chain for a term with marked success, a laber of the Pharmaceutical Standing ittee, a divisional secretary and con-

vener of the Education Committee, he had taken a special interest in the School of Pharmacy of the Royal Technical College, Glasgow. Mr. Martin Meldrum, a member of the board of examiners, had been a member of the Executive and Standing Committee for many years. Messrs. Committee for many years. Messrs. Guthrie and W. Spence Culbert asked to be specially associated with the chairman in his reference to the loss sustained by pharmacy in the passing of their friends and colleagues.

The annual statement of accounts to December 1945, as transmitted to the Council, was submitted, and it was reported that four most successful scientific meetings had been held during the session. A letter was read from the New South Wales Government expressing thanks for making available copies of papers read at the evening meetings.

Annual Meeting

It was moved by Mr. A. A. MELDRUM, seconded by Mr. Beattie, and agreed: "That the next election of Executive take place on Wednesday, June 26, 1946, and that the chairman and vice-chairman be appointed voting-paper scrutineers, with power to add to their numbers."

TOWARDS UNIFICATION OF PHARMACOPCEIA

An interim report of the Technical Commission of Pharmacopæial Experts constituted in 1937 by the Health Organisation of the League of Nations has been issued recently (Extract No. 4, 1945/46, Vol. XII of the Organisation's Bulletin: May 1945). It may be remembered that the feasibility of compiling an International Pharmacopæia has been discussed from time to time by the International Congress of Pharmacy since 1867; in 1885 we printed (C. & D., 1885. 569) the draft of a proposed book of this kind. It gradually became evident that any such project would best be approached by way of agreement on uniform standards for potent drugs and preparations. International agreements of this character were signed at Brussels in 1902 by representatives of eighteen countries and in 1925 on behalf of twenty-six countries. The latter agreement was ratified by fifteen governments, in ten cases with reservations. Article 35 of the agreement foreshadowed the continuance of the work under the auspices of the League of Nations. The Technical Commission formed accordingly in 1937 met in 1938 and 1939; its third meeting, fixed for September 1940, was abandoned in consequence of war conditions. Of the seven original members of the Commission three have died since 1939, with the result that most of the work of preparing the present report has fallen on Dr. C. H. Hampshire (chairman) and Dr. E. Fullerton Cook (chairman, U.S.A. Pharmacopæia While the report Revision Committee). was being printed, it became possible to communicate with the other two surviving members of the Commission, Professors H. Baggesgaard-Rasmussen and L. van Itallie, whose consent to publication has been obtained.

Contents of the Report

The first section of the report is introductory. Section 2, allotted to general rules, contains subsections headed Nomenclature, Galenicals, Standard Dropper. Section 3 is a table of usual and maximal doses. Section 4 is devoted to monographs on forty-seven drugs and chemicals. Section 5 consists of a list of "Drugs under Study for Inclusion in an International Pharmacopeeia." Most of the specifications in Section 2 appeared in the 1925 agreement (C. & D., 1925. II. 588-90). The standard dropper is defined precisely as one:—

"which at a temperature of 15° delivers not less than 0.08 g. and not more than o.12 g. of distilled water. . . . The instance ment may consist of a glass tube receptacle to which an outflow tube sused. The outflow tube must be sexternal diameter 3 mm. and intel diameter o.6 mm., and the drops sufflowing liquid must always fall cles.

Systematic Specifications

The table of doses is of considerate interest, some of the prescribed usual maximal quantities differing from the official in the British Pharmacopæia. table comprises mode of administrat usual dose, maximal single dose, and m mal daily dose. Two examples of these of doses may be mentioned. For chi hydrate they are respectively I gm., 3 | and 6 gm.; for phenol 50 mgm., 100 mg and 300 mgm. Each of the monograph in Section 4 is divided into several paragra and each paragraph (except, in some ca the first) has its own heading. For Digi Pulvis Standardisata the paragraph he ings are Description; Digitoxin; Los Drying; Ash; Assay; Storage. Hydrargyri Oxycyanidum the correspond headings are Description; Solubil Identification; Clarity and Reaction Solution; Chloride; Loss on Dry Ash; Assay; Storage. The "Identition" section comprises three subpgraphs, and the "Assay" two. Sl differences from the British usage in phar copœial latinity will be noticed by stud s of the report-e.g., alkaloids are new chloral is declinable, and sulfas is equivalent of sulphas. This publica gives promise of eventual agreement w it is most needed, namely, in respect of e most potent substances prescribed. Fur work is suggested by the fact that at e first meeting of the Commission 157 oul 272 drugs discussed were selected r "immediate attention," and by the for tion of a Committee on Galenical Pharn with Dr. Hampshire as chairman.

Glands from Abattoirs.—Facilities of collecting in the fresh state, and for store under optimum conditions, endocrine glass and other by-products of pharmaceus importance, are among the advantage a central system of slaughtering discubly De Vine ("Veterinary Record," Marc In addition to pituitary bodies, lipancreas, suprarenal glands, testicles, ovaries, pharmaceutically valuable products include gall and gelatin.

CHEMISTS' FRIENDS ASSOCIATION

MEETING of the C.F. Council was held on ril 4, the president of the Association F. E. W. Godding) in the chair. The eting was preceded on April 3 by a eting of the C.F. Standards Committee.

ension to Channel Islands

IR. T. HESELTINE reported upon a visit ich he had made to Jersey at the invitation of the Jersey Branch of the Pharmatical Society of Great Britain to explain Jersey chemists what their obligations ald be if the C.F. Association extended activities to cover the Island of Jersey, THE SECRETARY reported that, following Heseltine's visit, a letter had been eived requesting that the C.F. scheme extended to cover that island. The

extended to cover that island. The mell instructed the secretary to approach ernsey chemists to ascertain whether or they desired Guernsey to be included in proposed extension with a view to lementing the recommendation of C.F. ufacturers at their tenth annual meeting t.F. agreements should be extended over the whole of the Channel Islands.

ndards Committee

he report of the C.F. Standards Comtee recorded that Mr. J. Hearle had been ted *Chairman* for the year. A vote of nks was passed to Mr. S. J. Stearn for excellent services he had rendered to As oliation as chairman of the Comtee during the past two years. Four lications for manufacturer membership

of the Association had been considered, and the Committee recommended that the C.F. Council should refuse one application and defer full consideration of two other applications. The Committee recommended that the attention of the fourth manufacturer should be drawn to claims made in his literature, as it was considered that these could not be substantiated. application for the addition of a product to the schedule of an existing C.F. agreement was considered. Noting certain unjustifiable claims and contradictions in the literature supporting the preparation, the Committee recommended that the C.F. Council should advise the manufacturer concerned that the Council was unable to accept the application as it stood. The Council accepted the recommendations of the report.

Deletion from C.F. List

The resignation of Cambrian Holy Well Products, Neath, from membership of the C.F. Association was accepted. It was due to acquisition of the business by National Co-operative Chemists, Ltd. Nine applications for wholesaler membership of the Association were considered. Seven were refused and two deferred for further consideration.

Seven applications for maintenance of supply of C.F. products to businesses temporarily converted to drug-stores, owing to shortage of qualified chemists, were considered; five were accepted and two refused.

ORTH-EAST LANCASHIRE BRANCH OFFICERS

the annual meeting of the North-east leashire Branch of the Pharmaceutical iety on April 2 Mr. Thomas S. Nowell elected President in succession to Emeric Eccles, who has retained chair since the outbreak of war in 1939. Eccles recalled that he had hardly into stride as president when the ntry was enveloped in war clouds, and rmaceutical affairs, like everything else, e thrown into a state of chaos.

ty Campaign

IR. Nowell said that when he settled Blackburn he found unity in the proion held together by a few stalwarts. stillities had curtailed social activities, ntial work being carried on by the nch committee. Now that peace had urned they must strive for 100 per cent.

unity. Blackburn had reason to be proud of the fact that it had given a National Health Insurance service second to none, despite inadequate pay. The time had now come when that defect should be remedied, and the introduction of a national health service presented them with the opportunity. A united front was imperative. "It is what we do now that will matter for the next generation of pharmacists. Let us not have to repine because we were not sufficiently united."

Other officials to be elected were: Vice-president, Mr. Emeric Eccles; Secretary, Mr. Frank Gillibrand; Treasurer, Mr. Ř. Stevenson; Committee, Messrs. P. Doyle, Darwen, and J. Howley, Haslingden; Miss Standish, Accrington, Mr. W. Pidgeon, Great Harwood; and the following representatives from Blackburn: Messrs. W.

Holt, R. Turnbull, F. Mullineaux, W. Pomfret, B. Bracewell, N. Jones, H. H. Atherton, C. Haydock. Social Committee: Messrs. F. Gillibrand, L. Mosscp, R. Turnbull, J. Gillett, H. H. Atherton, F. Mullineaux, F. Burke and R. Lucas. Mr. R. Stevenson emphasised the importance of enrolling young members on the committee. He thanked Mr. Eccles for his long and valuable service. Mr. Nowell supported.

MR. Eccles said it was encouraging to know that one's work was appreciated.

His retirement from the presidency did 1 mean that he would cease to be activinterested in the Association and its welfa A 1944 register was auctioned and knockdown to Mr. H. H. Atherton for 22s. to go to the Benevolent Fund. In view the Health Fill proposal that hospit should be taken over by the State, it videcided to devote the proceeds of fut events to the Society's Benevolent Fundlesses. Eccles and F. Gillibrand wappointed delegates to the Joint Repsentatives' conference.

CANDIDATES OUTLINE THEIR POLICIES

Ten candidates for the Pharmaceutical Society's Council elections spoke on their policies at a meeting organised by the West Ham Pharmaceutical Association and Branch, at 17 Bloomsbury Square, London, W.C.I, on April 3. They were Messrs. G. H. Armitage, J. E. Crowe, and J. Gilmour, Mrs. J. K. Irvine, M.B.E., and Miss M. C. Islip, Messrs. R. M. Murray, T. Reid, G. Shaw, H. Steinman, and W. J. Tristram. Mr. Harris (chairman, West Ham Pharmaceutical Association) presided.

The two outstanding problems facing the profession which emerged from the outlines of policy which candidates gave, were the provision of adequate remuneration under the National Health Service, and of adequate pharmaceutical representation. The payment to pharmacists, mentioned one candidate, should be as favourable to them as the suggested salary scale of £1,500 to £2,000 would be to doctors under the scheme.

Discussion

In reply to a question by Mr. Hammond, Croydon, concerning payment under the National Health Service, Mr. G. Shaw stated that he was strongly in favour of payment by fee for Sunday and all-night services, and opposed the method of payment by the number of prescriptions done during these slack hours. Mr. J. GILMOUR, in a reply to the same question, maintained that out-of-hours dispensing should be paid for at an agreed rate, comparable to the overtime rates of trades unions. Messrs. H. STEINMAN, and ARMITAGE, MURRAY, and Crowe, also spoke in favour of payment by fee according to agreed rates. MISS PEARSEY (a student) suggested that it should be made easy for a pharmaceutical chemist to obtain the B.Pharm. degree. Mr. G. Shaw, in reply, regretted the position into which the Ph.C. qualification was falling in the eyes of the commicial world, but stated that the Senate London University had opposed previous any recognition of the Ph.C. diploma.

MR. S. ROBINSON (secretary, West H Branch) asked if, under the Natio Health Service, the pharmacist who actua dispensed the prescriptions could be party to the Service contract, rather the owner of the business. Candida pointed out that Mr. Aneurin Bev (Minister of Health) had given a rul that this would be, in effect, restraint trade, and was therefore not germane the Bill.

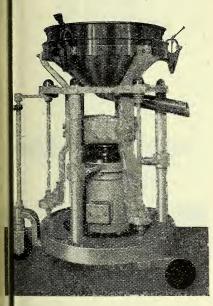

MR. FIRTH asked Mr. Gilmour wipractical steps he would suggest to att the solidarity within pharmacy which had mentioned in his outline policy. reply, MR. GILMOUR urged employee phimacists (numbering, he said, about 20,0 to support their own trades unions a organisations. Through these they sho co-operate with the National Pharmaceuti Union (an employer pharmacists' organition) to improve the lot of pharmacy a whole. As yet only 8 per cent. of employ pharmacists belonged to organisations. A G. H. Armitage suggested that pharmacists bould unite round the Joint Committee

Mr. E. A. Brocklehurst asked whet the candidates considered out-of-ho service to be the responsibility of Hea Centres or of retail pharmacies. Candida agreed that retail pharmacists must prepared to do the whole job and must i evade the responsibilities or farm out we to Health Centres. Mr. T. Reid sugges' a rota system for the twenty-four hours.

In reply to a question by Mr. Ab concerning the limitation of all dispens in shops to pharmacists, candidates sigested that dispensing should be done of by pharmacists and by registered appritices directly supervised by a pharmacist

SIFTING BY GYRATORY TURBULENCE

HEN, within less than two years, leading manufacturers in an industry adopt a new machine as if by common sent, it may be taken that some new and olutionary principle is involved—a prince, moreover, that results in noticeable nomies. In the Finex sifting and tablet-

ex stand-model sifting machine on wheeled trolley

nting machines, manufactured by Russell structions, Ltd., Russell House, Adam et, London, W.C.2, the underlying by is, perhaps, more accurately described ediscovered rather than entirely new. tw phrase, "controlled gyratory turbue," has been coined to describe it.

ct of Gyratory Motion in Sifting

very housewife knows that, to speed separation of ashes from cinders, the is given a gyratory movement by the ds holding it. The movement facilitates process by causing the particles to ll' on the surface of the mesh, present-each face in turn in rapid succession to apertures of the mesh. All bouncing ement—which only serves to wedge the icles in the apertures, creating dust and e—is avoided and the operation speeded, he Finex machine an electric motor,

vertical shaft, and flywheel impart to a horizontal screen, which may be an ordinary industrial mesh-bottomed tray, a gyratory movement of great intensity though small amplitude. The result, in terms of the sifting operation, is astonishing to watch. The fine material passes through almost at the speed at which a liquid can be poured. With good sifting material (dry and free from any tendency to cohere or "snowball") an output up to eight times as much as with ordinary sifting machinery may be anticipated. With poorer sifting material the advantage may be up to twenty times. In fact, the Finex principle makes practicable certain processes (such as the separation of solid matter from colloidal solutions) that are not even possible by simple screening. In effect, every particle of the material to be sifted, while being given a rotatory movement on one axis, is also charged with a second rotatory motion on an axis at right angles to the first, thus presenting each facet in turn to the apertures of the screen mesh. Moreover, devices have been made available for dealing quickly and effectively with the reject, without necessitating removal of the screen during the sifting process.

Removal of Reject During Operation

Of these devices one is the "clearing gate." If into the upright side of a brassrimmed sieve a gate opening is inserted, the gyratory motion of the machine drives the rejected matter continuously to the perimeter of the screen, whence it is discharged by opening the gate at intervals without stopping the machine. The reject is thus collected without the need for removing the screen—in itself a great saving in time and a corresponding increase in efficiency. The second, and even more novel, device for dealing with the reject without arresting the process is a continuous-acting patent "scroll" sieve. By means of a spiral strip of metal welded to the screen, the rejected material is directed progressively from the centre, into which it is fed from a hopper, to the edge of the sieve, finally passing out through an aperture at the end of the spiral. The scroll feature has its application also in straining liquids.

For certain materials, such as greasy powders, brushing through the sieve is desirable, and to this end a patent brushing gear has been made available. It consists of three circular brushes mounted upon a triangular or circular structure. The gear

derives its motion from the vibration of the machine, and thus adds nothing to the cost of running, which is that of a $\frac{1}{3}$ -horse-power motor.

Three Models

Three forms of the Finex sifting machine are being marketed by the company at the present time:—

(I) A laboratory test unit, which accommodates up to four 8-in diameter sieves for simultaneous grading; the results are identical with those obtained on the larger production units.

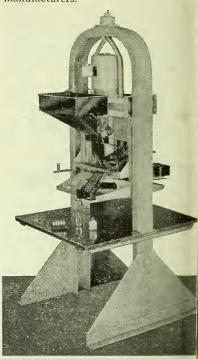

(2) A suspension-type production unit, built up in a frame about 6 ft. in height, capable of being suspended from any suitable overhead bearer. A cast-steel enclosure contains the flywheel assembly, which comprises the only moving part. The sieve assembly is mounted on a delivery funnel, which can be of stainless steel, vitreous enamel or other desired finish.

(3) A stand model, in which the essential parts are identical with those of the suspension model, except that the whole is supported upon a wheeled trolley that can be guided—one of the three rubbertyred wheels being swivelled—to any desired part of the factory floor.

Gyratory Tablet Counter

The success with which the gyratory principle has been applied to tablet counting has provided the tablet manufacturer with an adroit solution to some difficult problems. In the Finex machine devised for the purpose, the tablets, after rejection of broken and battered specimens, process slowly into a stream which is made to divide into five parallel substreams. These advance into a frame from which, by pressure of a lever, any desired number (not merely multiples of five) can be drawn off into a bottle held at the outlet. Alternatively, by means of a special fitment, the five substreams can be made to feed simultaneously into parallelsided glass tubes, a type of pack favoured by some manufacturers. The manner in which the tablets slide down into a horizontal position is fascinating to watch and unfailing in achievement, so that a cause of many production "headaches" is eliminated. No longer need hold-ups be caused by a tablet that obstinately insists on remaining at right angles to its companions in the tube. The highest speeds can be obtained with faultless counts. As an alternative to the arched frame illustrated, an open tubular ramework, permitting the use of a conveyor

belt between the two tables, is frequen provided. This is preferred by some tal manufacturers.

Finex tablet-counting machine

In all the machines, the gyratory viltion is subject to control as to amplite By its nature the process involves liwear on the parts, and the silence in with the machines operate is not their ledesirable feature.

More Nonscents.—The news that Eng perfumes are soon to be on the mark raises the question of names for them. Swe copy the American names or shall follow the French? I rather think ought to have robust English names English scents, such as Palmerston, Gstone, Disraeli, Hobbs, Cold Tub, GShow, Good Egg, Sou'-Wester, and, a concession to sentimentality, George El Or, if you prefer French names, Souveni Campbell-Bannerman, Soupir de Fleur de Mrs. Humphrey Ward, Souffle Henry James.—"Beachcomber" in "Daily Express."

HONEY DISTRIBUTION AND PRICES

extraordinary general meeting of the ney Importers' and Packers' Association held recently to consider proposals put vard by members of the Association se names are given below. The letter t to the secretary of the Association lesting the calling of the meeting stated:

(1) We wish to consider a proposal to be at forward at this meeting by Mr. A. C. W. impton, of Kimpton Brothers, Ltd., to Fenchurch Street, E.C.3, to the effect at the present basis of distribution of anufacturing honey to chemists and conctioners be immediately reviewed.

(2) To consider a proposal that this disibution is no longer carried out by the nine ms of honey bottlers who are undertaking at the moment, but that the distribution is ain undertaken by those who were doing to business before the War, i.e. the honey porters and No. 1 distributors.

(3) To consider that the prices being sarged to the chemists and confectioners neluding the price varying between 120s. and 133s. per cwt. for original bulk packages) drastically reduced and be made more in reping with the agreed imported price of s. per cwt.

(4) To consider a proposal that from this eeting an executive committee consisting

of seven members is elected to implement and carry out the proposals contained in the foregoing three paragraphs and to put these proposals into effect as soon as possible.

proposals into effect as soon as possible.
(5) To consider the proposals that the Association issues more information than at present about the honey position generally and that a quarterly report or honey news bulletin is issued by the Association to all members.

It is suggested that your Association contacts the Ministry of Food, asking for the attendance of Mr. Meadowcroft at this meeting.

A resolution based on the above suggestions was proposed but was referred back to a committee of the Association for discussion and will be further considered at a meeting to be held on April 15. The following were the signator es to the letter requesting the meeting: Kimpton Brothers, Ltd., James Laing (London), Ltd., Gill & Duffus (London), Ltd., H. W. Hooper & Co., Wilson & Mansfield, Ltd., D. J. Scott & Co., Foley Brothers (London), Ltd., J. Lycns & Co., Ltd., United Chemists Association, Ltd., Gill & Duffus (Glasgow), Ltd., E. A. de Pass & Co., Ltd. (in respect of paragraph 5), Boots Pure Drug Co., Ltd., and Timothy Whites & Taylors, Ltd.

DRUGS UNDER THE MICROSCOPE

Hanbury Memorial lecture, by Dr. H. Janssonius was read by Dr. T. E. llis at an evening meeting of the Phareutical Society in London recently. president of the Society (Mr. J. C. ung) was in the chair. Dr. Janssonius te: "I need not tell you that I sinly regret that I cannot come to England eceive your gift from your own hands. age prevents me from undertaking this ney. . . . It was a great pleasure to n that I am the second Dutchman who received this high distinction."

coints made in the address included:—
he working method I have always wed was designed so that the descripus should show a more or less indival character. I would therefore draw rattention to (1) their completeness, the regular and uniform order in which microscopical characters of the drugs enumerated, and (3) the "telegram" e. The two last features are an applion to microscopy of the methods of cription of the macroscopical characters plants designed by Linnæus. The gram style avoids repetitions.

I have followed the same general principles in my microscopical researches upon Javanese woods. After having finished "Mikrographie des Holzes der auf Java vorkommenden Baumarten" (Micrography of the Javanese woods), I thought it would be valuable to other students if I composed a key with the aid of which they could find the family, genus, species, and sometimes also varieties of each specimen. The key appeared in July 1940. The manuscript of a translation into English is at this moment waiting to be printed. In general my systematic results correspond more or less with those of the taxonomists working with macroscopical characters. However, I have sometimes had occasion to note that the microscopical examination of wood yields systematic results deviating from the

generally accepted ones.

Dr. F. J. Dyer asked if Dr. Janssonius had included chemical reactions in his methods of identification. Dr. Wallis replied that the chemical reactions of the individual cells and their contents were always given.

Mr. Young moved a vote of thanks.

OVERSEAS TRADE NEWS

New Palestine Soap Company.—It is announced from Jerusalem that a new Arab factory for making oil, soap and margarine has been established in Jaffa. The firm, which has been registered under the name of Eastern Oil and Soap Co., has a capital of £65,000.

Norway May Acquire German Whale Oil Factory.—An Oslo message states that Norway may receive the German 13,000-ton floating whale oil factory "Walter Rau" in part compensation for shipping losses. About 500,000 tons of whale oil have already been produced by Norway this year.

U.S. Surplus Drugs.—A message from New York states that priority claimants, such as hospitals and Government agencies, have bought the bulk of drugs recently declared surplus by the U.S. Government. Only small quantities of the products valued about \$3 million have reached the trade.

U.S. Seeds and Oils Market.—New-crop cassia seed, extra-selected broken, is being offered from Hong Kong for April-May shipment at 28½ cents. Negotiations for the purchase by Washington of Argentine seeds and oils surpluses are now under way, and second quarter allocations are expected to be contingent upon the decisions taken.

Indian Castor Seed Crop.—This year's Indian castor seed crop has been officially estimated at 105,000 tons and the area planted out at 1,237,000 acres, which compares with last year's revised estimates of 131,000 tons and 1,468,000 acres, respectively. The crop is reported to be on the whole in fairly good condition.

U.S. Import Restrictions Lifted.—The U.S. Civilian Production Administration has lifted restrictions on the importation by private companies of rotenone-bearing roots, to take effect immediately. At the same time the Office of Price Administration announces that the agency will establish maximum import prices for such material.

Trade Mission to Denmark.—A trade mission, headed by Sir Guy Locock, vice-president of the Federation of British Industries, has arrived in Denmark to discuss with the three leading Danish industrial and commercial organisations the nature of Denmark's import requirements and how far Great Britain can meet them.

U.S. Fats and Oils Outlook.—Agitation continues for higher maximum prices on fats and oils in the United States. The short-

age has not been relieved and althouse negotiations with the Argentine are pagressing, it is intimated that the Unil States is treading cautiously. It is belied that castor bean cultivation in Brazil be expanded further while reports indiction in creasing production of tung oil.

Savannah Rosin and Turpentine Markel Domestic consumers are still having doulty in procuring sizable quantities higher grades of rosin. Export demit continues keen, but only a few additic licences have been issued; exporters eagerly awaiting the announcement of second quarter quota. Offerings of turning from old-crop stocks are being more liberally; demand is fairly brisk prices are well maintained at ceiling lev

I.C.I. Post-War Planning in Australia Imperial Chemical Industries, Ltd., examining the whole range of their Austrian activities with a view to postplanning, declared Lord Glenconner on arrival at Brisbane, according to Reu "Our attitude is to assist any new en prises for which we see reasonable prospe he said, adding, "Queensland has trendous potentialities." After visiting Sydi Lord Glenconner will return to Engl by air.

Sudanese Cottonseed for Egypt.—Ret reports from Alexandria that following dissolution of the United Kingdom oporation, the Oils Chamber (a section the Egyptian Federation of Industries) proposed to import cottonseed from Sudan. An agreement to this effect been concluded between the Ministry Finance and the Oils Chamber, where the latter will import 40,000 tons of cottseed this year, to supply oil mills Alexandria, Beni-Kerra and Minia.

Increased Indian Opium Alkaloid duction Suggested.—A Reuter message 1 Calcutta states that the Indian Chem Manufacturers' Association has repeate urged the Government of India to allo few well-established firms to engage in manufacture of opium alkaloids. Association denies the Government tention that the output of the Ghaz factory is sufficient to meet dome requirements and maintains further' the quality of the products manufacti by the above plant is below standard. Association is further concerned about possible effect of increased imports f foreign countries.

TRADE REPORT

t quotations for pharmaceutical chemicals, crude drugs and essential oils represent the es for wholesale quantities of standard quality. C.i.f. quotations do not include excepal marine risk insurance and other abnormal charges payable under present conditions.

28 Essex Street, W.C.2, April 10

AIRLY brisk demand is reported from CRUDE DRUGS section of the markets, export inquiries on a satisfactory scale. es are generally firm, with fluctuations s ll and few in number. Makers and ers report stable conditions in Pharma-C FICAL CHEMICALS. ACETANILIDE and HETAMINE are in good demand, but E zoic acid is reported to be in short As the result of the substantial ri in Bismuth metal noted last week, ples of Bismuth salts are now under new and it is anticipated that increases w be notified in the very near future. A ew Order (S.R. & O. 1946, No. 494) it eases the maximum price of all grades OF INC OXIDE by £7 per ton.

C e Drugs

emand in these markets has been quite and prices have remained stable th ighout the week. Prices of Antimony at firmly maintained at the recently at need level with total production being re ly takeń up. Buchu Leaves are in compass on spot at the price menti d last week. A fair trade is reported in ninese Camphor (see paragraph below). C. DAMOMS are scarce and firm. CASCA-RIA quills have now arrived to replenish th markets. Chillies are quiet and un anged. Spot supplies of Kamala are es usted. MENTHOL is in good demand at ichanged rates. Supplies of QUILLAIA are reported affoat. RHUBARB is lily to be obtainable from China in st cantial quantities. Spot business in SA APARILLA is reported to have been do at rather widely varied prices. Some at als of Fennel and Fenugreek seeds ar ecorded; DILL is again quoted easier. T. upward price trend in CARNAUBA w continues.

Caphor Supplies

is understood that no further licences be issued for the importation of sy letic camphor from the United States, as llar currency is not available for that pose. Fair business is therefore likely done in China for supplies of natural hor to come along in due course; the appear to be plenty of offers from the source. The bulk of the natural

camphor for the world's markets is produced in Formosa, where it was formerly refined up to the "BB" grade, i.e. practically, but not quite, up to the standard of the British Pharmacopæia. Before the war the "BB" grade camphor was sent to Japan, where it was made into the slabs, powder and tablets of commerce. Importers in this country are now hoping that this process will in future be carried out in China.

Essential Oils

Among the English-distilled oils, Clove is keeping fairly firm with the price unchanged. Little NUTMEG is available at present. The position of Synthetics and Isolates, although somewhat improved, is still difficult as regards supplies. Dearer prices are quoted for a considerable number of items.

U.S. Drug Market Report

New York, April 5

THE quotation on Spanish MERCURY has been reduced further and the action is viewed in many circles as the beginning of an attempt to recapture the American market; domestically produced metal declined in sympathy with the Spanish product. Future domestic production is well sold up and SILVER SALTS are moving into a tighter supply position as a result. The complicated position on the Menthol market has not clarified itself over the past week; while activity in this material is not on a large scale at the present time, quotations on the Brazilian product for shipment are reported higher. However, production in that country is well under way and some reaction should be in evidence in the near Methanol continues firm though FORMALDEHYDE manufacturers are receiving adequate deliveries at present; supplies of GLYCERIN against back orders are falling further behind schedule; a substantial increase in demand, particularly on the account of protective coating manufacturers, has been noted. AMINOPYRINE, ANTI-PYRINE and ACETYLSALICYLIC ACID are all exceedingly scarce at the present time. The CRUDE DRUGS markets have been featureless during the week. Exchange developments have forced spot prices on GUM TRAGACANTH higher, according to reports, while an increase in the price of

Gum Arabic resulted from a keener interest shown in the material. Considerable detentions by the Food and Drug Administration are forcing the prices of many botanicals higher and increasing costs are contributing to the tightening situation. Items such as COPAIBA, RHUBARB ROOT, Cocillana, etc., are now virtually un-obtainable despite higher prices. Chinese exporters are offering Cassia oil for prompt delivery at \$3.75 and Aniseed oil at \$1.75, according to latest advices. Buyers here are showing little interest in these oils, however, on the assumption that further declines in the quotations will soon be announced. The position is regarded as easier than at any time since the war started. Elsewhere, a generally steady tone prevails with better supplies forecast as a result of changes in price regulations governing ESSENTIAL OILS. PEPPERMINT has been active throughout the week and a tighter situation is developing. Offerings of new lots of Dalmatian SAGE are at about twice the quotation for the Spanish product.

Pharmaceutical Chemicals

ACETANILIDE.—Makers report fair demand. Powder is quoted at 2s. 5d. per lb., and crystals at 2s. 6d.

AMPHETAMINE.—Steady at makers' price of 150s. per lb.

ASPIRIN.—Makers' prices per lb. for the home market are steady. Rates, in quantities of 28 lb.—I cwt., are as follows (containers in brackets): 4s. I¹₂d. (I-lb.); 4s. (4-lb.); 3s. IId. (7-lb.); 3s. IO¹₂d. (I4-lb.); 3s. 9¹₂d. (28-lb.)

Barium Sulphate, B.P. (x-ray).—Prices per lb. quoted by makers, in 28-lb.—I cwt. lots, for home sales are (containers in brackets): 1s. 6d. (I-lb.); 1s. $4\frac{1}{2}$ d. (4-lb.); 1s. $3\frac{1}{2}$ d. (7-lb.); 1s. 2d. (28-lb.). Prices are net, one month.

BORAX.—Ton lots are quoted as follows: B.P. quality, granulated, £38; crystal, £39; powder, £39 ros. Commercial grades, £8 per ton less. Packed in one-cwt. bags, delivered carriage paid in Great Britain, in one-ton lots and upwards.

BROMIDES.—POTASSIUM, in quantities of 28 lb., is quoted at the following rates per lb. (containers in brackets): 3s. 2½d. (1-lb.); 3s. 1d. (4-lb.); 3s. (7-lb.); 2s. 11½d. (14-lb.); 2s. 10½d. (28-lb.). SODIUM, 1½d. per lb. less, and AMMONIUM 1½d. per lb. more, than above prices. Prices are net without engagement. Resale clause applies.

BRUCINE.—Current rates per oz. are as follows: Alkaloid.—Under 25 oz., Is. 4½d.; 25 oz. and under 100 oz., Is. 4d.; 100 oz. and under 500 oz., Is. 3½d. NITRATE and SULPHATE.—Under 25 oz., Is. 3½d.; 25 oz. and under 100 oz., Is. 3d.; 100 oz. and under 500 oz., Is. 2½d.

CHLORAL HYDRATE.—Steady; current p s are as follows: I cwt., 3s. Iod. per lb.; 56, 4s.; 28 lb., 4s. 2d.; I4 lb., 4s. 6d.; 7, 4s. 9d.; less, 5s. 3d.

CITRATES.—Prices per lb. for Potassium in quantities of 28 lb.—I cwt., are as follows (intainers in brackets): 3s. 7½d. (I-lb.); 3s. 1. (4-lb.); 3s. 5d. (7-lb.); 3s. 4½d. (I4-3s. 3½d. (28-lb.). Ferri et ammon. cit., 1. 2d. per lb. above; Sodium, B.P., 3d. per lb. delow; Powder, Id. per lb. extra.

Mandelic acid.—In good demand. Cui t quotations are as follows: I lb., 22s. per ; 4 lb., 20s. 3d.; 7 lb., 18s. 6d.; 14 lb., 16s. ; 28 lb., 15s.

METHYL SALICYLATE.—In good supply. Si s are quoted at 2s. 6d. per lb.; winchester t 2s. 1½d.; 56 lb., in demijohns, 2s.; I cwi a demijohns or carboys, Is. II½d.; 5 cwt., Is. All prices net.

PHENOLPHTHALEIN.—Unchanged at the lowing prices: Less than 7 lb., 4s. 8d. per 7 lb., 4s. 7d.; 14 lb., 4s. 6d.; 28 lb., 4s.; cwt., 4s. 4d.

Terpineol.—Pure medicinal quality v be obtained at from 3s. 3d. to 4s. per according to quantity.

THEOBROMINE.—Current prices are as lows: Alkaloid.—Smalls, 44s. 6d. per ; 7 lb.—28 lb., 43s. Sodium salicylate.—Sr s. 26s. 6d.; 7 lb.—28 lb., 25s. 3d. Tins extra

ZINC OXIDE.—Maximum price has advanced by £7 per ton as from April 8 (Co of Non-ferrous Metals (No. 22) (Copper, d and Zinc) Order, 1946) (S. R. & O. 1946, No.).

Crude Drugs

ANTIMONY.—Firm conditions obtain in is market with prices at the recent incle. Minimum 99.6 per cent. regulus, £132 s. per ton; minimum 99 per cent., £125; 7 er cent. crude, for the home trade, £105 per 1, delivered.

ARECA NUTS.—Dealers' quotations are s at 75s. per cwt. on the spot; shipment, c.i.f.

Balsams.—Canada continues firm but the spot price is unchanged at from 13s. 6 to 14s. per lb.; Peru, steady at 8s. 3d. per Tolu and Copaiba are unobtainable.

BISMUTH.—As noted last week, price as advanced to 9s. per lb. for high-grade in minimum 5-cwt. lots.

Buchu leaves.—Small supplies on the would be worth 5s. per lb.

CAMPHOR.—A fair business is report in Chinese natural to come forward at nos. 6d. to 12s. 6d. per lb., duty paid.

CARDAMOMS.—Continuing scarce and ty firm. Aleppy seed, spot, 8s. 6d. per Aleppy greens, 7s. 3d. to 7s. 6d.

CASCARILLA.—It is understood that su of quills are now landing; price, 3s. 3d. I b. Shipment, 2s. 3d. per lb., c.i.f.

HAULMOOGRA.—Spot price of Hydocarpus changed at 2s. per lb., in tins in cases.

ILLIES.—Quiet and unchanged. Mombasa,

sp 150s. per cwt., sellers.

NNAMON.—Small spot stocks of chips would re re 2s. 2d. per lb.; quills are unobtainable oves .- In quiet demand on spot, with oves.—In quiet demand on spot, with Z ibar selling at is. id. per lb.; shipment, A —May, 9\frac{3}{2}d. per lb., c.i.f., buyers' licence.

chineal.—Silvers and blacks are priced

at . 6d. per lb. on the spot.

LOCYNTH.—Good-quality pulp is quoted or of at from 2s. 6d. to 2s. 9d. per lb.

GITALIS LEAVES. — Business negligible; pi s unchanged. Portuguese, spot, pe wt.; English, 2s. 6d. per lb.

M ACACIA.—Kordofan cleaned sorts, in liped supply, is quoted on the spot at 67s. 6d. powt.; bleached is at 145s., and cleaned Ti at 42s. 6d.

NBANE.—Spot quotation for Indian leaf is st y at 250s. per cwt.; Egyptian (muticus),

LAP.—Material testing 12.1 per cent. may be d on spot at 3s. 3d. per lb.

MALA.—Spot supplies are exhausted.

RAYA GUM.—No. I Indian gum is obtainat on spot at 215s. per cwt.

LA NUTS.—Small spot supplies are quoted as llows: African quarters, 8d. per lb.; Al in halves, 6d.; Jamaican washed halves,

NTHOL.—Brazilian continues to be quoted at is. to 35s. per lb. A good business is re ted for export.

x vomica.—A few parcels of Cochin on are quoted at 45s. per cwt.; Mangalore,

IENTO.—Spot sellers at is. 31d. per lb.; sh lent, 122s. 6d. per cwt., c.i.f., buyers'

ILLAIA BARK.—Supplies are reported af . Natural will be at 110s. per cwt., and cut 130s., ex warehouse

UBARB-While there is nothing on the sp at present, business is reported done from Cl. for later shipment. Price mentioned is free 10s. 6d. to 11s. 6d. per lb., c.i.f., April-M shipment.

SAPARILLA.—Spot business is reported de in native Jamaican at 4s. per lb., with a le more available at that figure. Other qu ers report a price of 3s. per lb. for good-

quely material. EDS.—Small consignments of Fennel environments of Fennel and renugreek have arrived, and are quoted 5s. per cwt., and 85s. per cwt., respec-ex Liverpool. Indian Dill is now

qu'd on spot at 90s. to 95s. per cwt.

AGACANTH.—Selected grades continue but the price is unchanged at £160 per Medium grades are quoted as follows: white, £145 per cwt.; No. 2, white, £125; white, £110; No. 4 white, £85; pale leaf, £50; amber leaf, £50; dark amber, £35; brown leaf, £25; red-and-brown leaf, £20; red leaf, from £17; hoggy, £12 to £15.

Turmeric.—Supplies affoat but available only for export are quoted at 85s. per cwt.

Valerian root.—Belgian, on the spot, now quoted at 280s. per cwt.

WAXES.—The upward trend in CARNAUBA continues. Current rates are as follows: continues. Current rates are as follows: Fatty grey, spot, 88os. per cwt., nominal; chalky, 85os., nominal; prime yellow, 1,100s., nominal; shipment, fatty grey, 85os., nominal; prime yellow, 1,020s., nominal. BEES'.—Quoted on the market as follows: BEES'.—Quoted on the market as follows: Dar-es-Salaam, spot, 330s. per ewt.; shipment, April-May, 310s., c.i.f.; Benguela, April-May, 275s., c.i.f.; Abyssinian, April-May, 280s., c.i.f. Ouricuri.—Spot, 8-9 per cent.; forward, no offers. Candellilla.—Spot, nominal; shipment, to arrive April pot, nominal; shipment, to arrive, April-May, 435s., in store.

Essential and Expressed Oils

CLOVE.—English-distilled bud oil is firm at 12s. 6d. to 13s. per lb., according to quantity.

LINSEED.—Fixed price of crude is unchanged at £65 per ton, naked ex works.

NUTMEG.—Little available at present. Price is nominal at 55s. per lb.

PALM KERNEL.—Bulk supplies are officially priced as follows: Refined deodorised, £49 p r ton; refined hardened deodorised, £53, naked ex works.

Synthetics and Isolates.—Although some improvement is evident in the immediate stock position and prospects are somewhat brighter, supplies of many of these products remain short. The items quoted below are not necessarily available because prices are given (rates per lb. unless otherwise stated) :-

Amyl acetate, per cwt. 122S. 4s. 6d. Amyl salicylate Aubepine, perfumery quality 5os. 4s.-4s. 6d. Benzyl acetate . . Benzyl alcohol 4S. Benzyl salicylate 12s. 6d. . . 7s. 6d.-8s. Butyric acid . . Cinnamic aldehyde ... 9s. Citral, chemically pure 55s.-6os. . . Citronellal 60s.-70s. (nominal) Citronellol 60s.-70s. (nominal) 17s. 6d. Coumarin Ethyl butyrate 8s.-9s. 2s.-2s. 6d. Ethyl phthalate Eucalyptol ... 13S. . . ٠. 18s. 6d. Eugenol . . Geraniol, ex palmarosa 8os. Geranyl acetate 85s. . . gos. Ionone, 100 per cent. Isoeugenol 22S. . . Methylacetophenone I5S. Methylbenzoate 6s. Methylphenyl carbinyl acetate

Rhodinol, African geranium

I4S.

TRADE MARKS

(From " The Trade Marks Journal," March 20)

"Folk Dance"; for bath salts, talcum powder, face powder and face cream, lipstick, brilliantine, hair lotions, soaps, perfumes and dentifrices (3). By Lentheric, Ltd., 17 Old Bond Street, London, W.I. 638,323.
"LOVE MIST"; for toilet and cosmetic prepara-

tions, lipsticks, perfumes (3). By Erik Friis-Hansen, c/o J. E. Evans-Jackson & Co., 49 Albert Hall Mansions, Kensington Gore,

London, S.W.7. 638,505.

"AZOCHLORAMID"; for antiseptics for human use (5). By Wallace & Tiernan, Ltd., Power Road, Gunnersbury, London, W.4. B631,352.

"KATIODIN"; for antiseptic preparations for human use, containing iodine compounds (5). By P.A.C. (Chemicals), Ltd., 15 College

Road, Epsom, Surrey. 637,559.

"ESOBACTULIN"; for pharmaceutical preparations and substances (5). By Southon Laboratories, Ltd., 88 Upper Richmond Road, London, S.W.15. 637,928 (Associated).

"ZENOLIN"; for antiseptics (5). By T. J. Smith & Nephew, Ltd., Neptune Street,

Hull. 638,049.

" JEANNETTE"; for pharmaceutical preparations and substances (5). By Jeannette, Dudley House, 36–38 Southampton Street, London, W.C.2. 638,328.

Device of a razor blade (disclaimed) and words "BARBASOL blades, double edge. A better blade, rust resisting" (with colour restriction); for razor blades; also the word "BARBASOL" for razors and razor blades (8). By The Barbasol Co., c/o McKenna & Co., 14 Waterloo Place, Pall Mall, S.W.1. 637,077-79 (all Associated).

"CIBA"; for surgical, medical, veterinary and dental instruments and apparatus (10). By Ciba, Ltd., c/o Abel & Imray, Quality Court, London, W.C.2. 636,685 (Associated).

"IVRICO"; for edible oils and fats (29). By Mansfield & Co., 57 Glengall Road, Peckham,

London, S.E.15. 638,253.

HENAN is a synthetic substance, p-benzylphenyl carbamate, which has been used successful for some years for the treatment of threadworm infestation. It is more effective than nin, and completely free from the unpleasant and sometimes serious side-reactions that accompany the use of that substance, such as nausea, vomiting and visual disturbances.

At aphenan is also nearly tasteless it is particularly suitable for administration to children.

Jumble or Judgement

The front page of any popular newspaper can teach us all a thing or two about display. The newspaper doesn't award equal display value to everything. It selects—gives real prominence only to the important items.

x

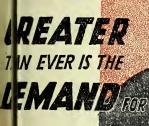

A very good customer of ours with a magnificent pharmacy on a main thoroughfare paying a high rental kept in a centre Simpson Foot Ointment display (only 2½ feet wide) for 17 weeks and did such an amazing turnover that our Managing Director went to see him to find out how he did it. "I don't do anything specially" said the chemist "except keep the display in. But I know of course, exactly what my window sells. see I pay here 33/8 per foot of window frontage all-in per week and I keep a card index of the gross yield per foot of each display space brings. Simpson's Foot Ointment, with the terms you give, is the 2nd

most profitable line I have so naturally it is one of the most prominent items in my window."

That's realism. And realism pays in business. What's the alternative? You can crowd the window with everything and get a jumble—a confusing array of distracting products many of which pay only 18% to 30% and are not C.F.!

No, a jumble isn't an eye catcher. It doesn't make people stop. It doesn't bring people In short, it doesn't represent a realistic, scientific use of window space. Try a really bold display of Simpson's Foot Ointment. You'll be on a pretty good wicket. From a recent independent large scale market research, Simpson's Foot Ointment topped the list as the largest selling of all foot preparations. And, you get just over 40% on best bonus terms. Simpson's is C.F. anyway.

These characteristics have established the leadership of 'ASPRO' among medicinal lines in all parts of the world to which it has been introduced.

Unique marketing methods, which service to the distributor and to the public is the first consideration, have secured for 'ASPRO', everywhere, a standard of goodwill which lifts it "out of the rut," above the inroads of plagiarist or imitator.

'ASPRO' protects its distributors' interests as wholeheartedly as it protects the people's health. Wholesalers and retailers quickly realise that 'ASPRO' is synonymous with fair trading, a ready seller which renders genuine service to the public. As a result, 'ASPRO' enhances the high reputation of British goods wherever it is sold.

"USE YOUR WISDOM WISELY"

PROBABLY you've already seen the first of the new Wisdom advertisements in the National and Provincial press. We were inspired to prepare this "use your Wisdom wisely" series by the very high proportion of people shown to have bad teeth on joining the Forces — bad teeth due largely to sad ignorance of oral hygiene.

The Armyhas already done much to teach Service men how to clean their teeth properly. Our instructional advertisements will carry on the good work. They are some thing rather new in the way of advertising. Each advertisement has been checked by an eminent dental authority and the series will be of real use and value to the community.

Peopleshould come to have the greatest confidence in the brush made by those who sincerely have the public interest at heart.
